PROJECTS

Mai Fitness | mai-fitness.netlify.app

Jan. 2024

- Created a Fitness Exercise gallery utilizing React, JavaScript and Material UI.
- Used hooks for website logic including getting API calls from RapidAPI and filtering it based on search function.
- Implemented full search functionality using YouTube search API to show "Similar Exercises", recommending videos in real time.
- Created various animations using React hooks such as infinity loading bar and buttons.

Portfolio Website | brandonmai.netlify.app

Dec. 2023

- Styled portfolio to showcase projects, skills, and aspirations.
- Utilized media queries to ensure high quality responsiveness on all screen types.
- Utilized JavaScript to create a seamless scrolling experience along with animations on buttons and a hamburger menu.

Songify | *Java, Object-Oriented Programming*

Apr. 2023

- Created a text-based audio management app for managing songs, audiobooks, and podcasts within a library.
- Implemented core features such as content download, playlist creation, and playback.
- Implemented search functionalities by title, artist, and genre.
- Enhanced download options to support large quantity downloads and retrieval by artist or genre.
